

Next generation of urban and regional transportation

In 2035, according to the UN, 60% of the population on our planet will live in cities or in urban areas. Therefore, fast, reliable and safe intra-urban transportation will become the challenge of any city that wants to stay livable.

While cities grow, regions need to stay connected to their respective hubs or need to stay connected to each other. New air vehicles technology will allow even remote areas to be served efficiently.

Who we are and what we do

EBIRD is a new-technology driven air mobility provider with focus on two business areas:

- Urban Air Mobility, range up to 50 km in densely populated urban areas
- Regional Air Mobility, range up to 300 km in-between regional areas

We believe that Urban Air Vehicles (UAV) and newly developed Regional Air Vehicles (RAV) will become part of our daily life.

We work on integrated mobility solutions at the third dimension for smart cities of the future and the smart regions of the future: Urban Air Mobility (UAM) and Regional Air Mobility (RAM).

EBIRD will offer highly efficient, silent transportation at affordable fares and with renewable energy and with zero emission using next generation electric powered air vehicles and plans to start eVTOL-operations in 2023.

We fill the gap between today's traditional urban transportation and executive transportation at affordable fares and with renewable energy.

Our vision and our mission

We are the first mover Urban Air Mobility and Regional Air Mobility provider in Europe. We offer air mobility solutions within and between smart cities and smart regions using tomorrow's green technology.

We are the missing link between traditional air and public ground transportation and cab companies. We offer safe and reliable transportation at the third dimension, sustainable and at attractive and affordable fares. We are part of a seamless travel system.

EBIRD AG

Balz-Zimmermannstrasse 7, Kloten, Switzerland
P.O. Box, CH-8058 Zurich-Airport, Switzerland

Management Team

Dr. Hans Jörg Hunziker is Co-Founder and Chairman of the Board of EBIRD. Hans Jörg is an experienced leasing and finance specialist, who can draw on over 35 years in the aviation industry. He held various management functions within the SAirGroup (incl. CEO of Flight Lease AG), is today the CEO of Alljets AG and Board Member of Willis Lease Finance Corporation, USA.

Florian A. Dehne is Co-Founder and as non-executive Director responsible for the strategy. Florian has an extensive aviation background and held various management functions within the Lufthansa Group in Germany, the US, UK and Switzerland. In this capacity, he combines his passion for entrepreneurship, innovation as well as urbanism and its anthroposphere.
